

Catcher Technology Co., Ltd.
Circular Economy and Waste Management Policy and Commitment

Circular Economy and Waste Management Commitment

To promote sustainable business development and strengthen environmental and natural resource governance, the Company, in accordance with Article 14 of the Sustainable Development Best Practice Principles approved by the Board of Directors on March 3, 2026, takes into account the environmental, ecological, and social impacts of its operational activities. The Company actively promotes and advocates the principles of sustainable consumption and conducts its research and development, procurement, production, operational, and service activities in accordance with the following principles, with the aim of minimizing adverse impacts on the natural environment and human society:

1. Reduce resource and energy consumption throughout the product and service life cycle and improve resource efficiency.
2. Reduce emissions of pollutants, hazardous substances, and waste, and properly implement waste segregation, treatment, and management.
3. Enhance recyclability, reusability, and circular utilization of raw materials and products.
4. Maximize the sustainable use of renewable resources and enhance the circular value of resources.
5. Extend product lifespan and durability to reduce resource depletion and environmental burden.
6. Continuously improve the overall performance and environmental friendliness of products and services.
7. Emphasize biodiversity and ecosystem conservation on land and in oceans, and promote the sustainable use and equitable sharing of natural resources.

Scope of Application

This policy applies to all operating activities of the Company and its subsidiaries. All employees, suppliers, contractors, business partners, and other stakeholders are required to comply. Through collaboration across the value chain, the Company jointly implements waste reduction, resource recycling, and circular economy initiatives.

Circular Economy and Waste Management Policy

The Company complies with the “Sustainable Development Best Practice Principles” and the ISO 14001 Environmental Management System, and continuously promotes waste reduction and circular economy initiatives. Through process optimization, improved resource efficiency, enhanced recycling and reuse, and the establishment of waste tracking systems, the Company implements proper classification and management of both general and hazardous industrial waste. These efforts aim to reduce waste generation, improve resource utilization efficiency, and continuously enhance circular economy performance.

1. Promote circular economy practices and the use of sustainable materials to reduce environmental and natural resource impacts across the value chain.
2. Implement waste reduction management by improving processes at the source, optimizing production, and increasing recycling and reuse rates.
3. Strengthen waste safety management to ensure proper classification, storage, collection, and treatment of all waste, and establish accountability tracking mechanisms to monitor waste flow and prevent environmental pollution or impact.
4. Collaborate with employees, suppliers, partners, and other stakeholders to jointly fulfill waste reduction and circular economy commitments.
